

# Smart Pill Box

The **challenge**: patients forgetting to take their medications on time.

The **solution**: a pill box that keeps the patient on schedule to take their medications.

We present you with the **Smart Pill box**

Annotations

- 1

There are two ways a caregiver can discover if the patient has not taken their medications on time, one way is by a notification on their smart-phone.
- 7

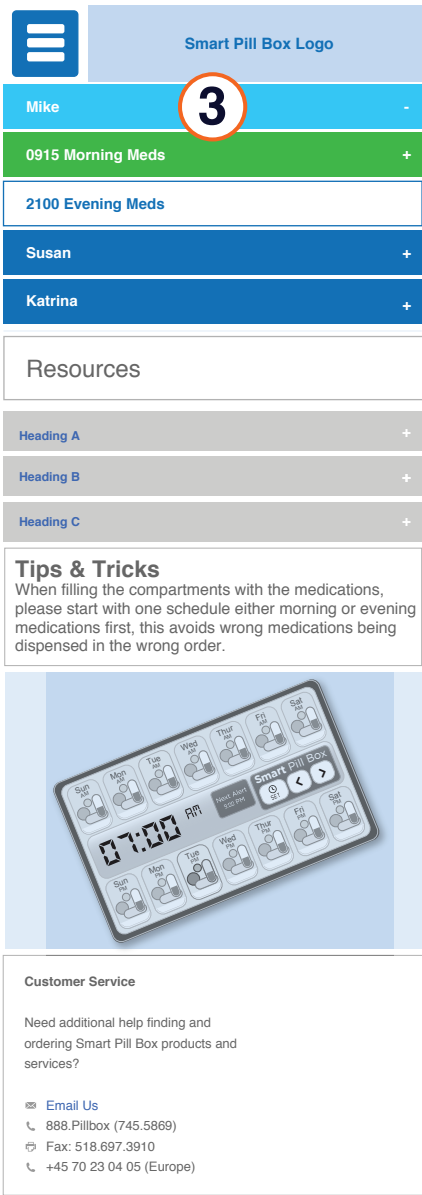

The caregiver has the option to call the patient to remind them to take their medication.

Annotations

- 2

The second way is by looking at the patient profile on the Smart Pill Box App.
- The caregiver can view the morning and evening med schedules to see what has been taken or has been not been taken and at what times.
- The caregiver can select Mike from the navigation to see which meds have been taken or have been not been taken and at what times.
- When selected the tab highlights.

Annotations

- 3

The caregiver can view the morning and evening schedule for meds by selecting the highlighted tab.
- The caregiver can view that the morning meds has been taken at 09:15. The pill box and app indicator is highlighted in green.
